

**IN THE CLAIMS:**

The following is a complete listing of claims in this application.

Claims 1-4 (canceled).

5. (currently amended) A light emitting diode device comprising:

a substrate made of resin;

an LED mounted on the substrate;

a transparent layer made of transparent epoxy resin and sealing the LED; and

a reflector film made of epoxy resin containing white pigment and formed around peripheral outside walls of the transparent layer, except for an upper surface of the transparent layer as a light emitting surface,

wherein the reflector film has a length and width corresponding generally to those of the substrate, and a height corresponding generally to that of the transparent layer.

6. (new) The light emitting diode device according to claim 5, wherein the substrate has a plurality of LED's mounted thereon.
